

Week Report 8

What is VIM?

- Vi is a command-line text editor included in all POSIX compliant operating systems.
- the vi command is now linked to the vim command, so now when you're using vi, you're actually using the vim editor.

What is nano?

Describe in your own words how to:

- Start and quit vim
 - to start: open a terminal and type vim
 - to quit: you have to press esc key and then ':qa!'
- What are the different vim modes:
 - COMMAND & INSERT
- Insert text in vim
 - you have to start typing INSERT and it'll let you type
- Save a file in vim
 - to save type: ':w'
- Search for a word inside vim
 - you have to use '/' and the word you want to search for. so like '/text'
- Delete text in vim
 - to delete text in vim there are some different ways you can do it. to delete the current word use 'dw' and to undo what you just typed use 'u'
